

Steps we are taking to welcome you back:

Enhanced patient protection measures: All of our staff members have upgraded their protective gear and hygiene for each visit. This includes appropriate personal protective equipment (PPE) for all appointments. Between patients, we meticulously clean, disinfect and sterilize rooms, instruments, and all surfaces in operatories.

A virtual waiting room: To continue social distancing measures, we have set up virtual "waiting room" procedures for our patients to check in via text message and wait, if necessary, somewhere safe outside the clinic, such as in a car. On the day of your appointment you will receive detailed instructions from us – stay tuned!

Tech-enabled screening: Prior to your visit, you will be sent a digital screener. We screen patients in advance for COVID-19 symptoms and risk factors to ensure our clinic stays COVID-free for your safety. We also screen our team members.

Air filtration: To ensure air quality is sanitary and aerosol producing procedures are neutralized in between patients, we have invested in high efficiency air filtration systems. This increases safety from germs and other pollutants.
